

CORMAX™ Patented Keying System

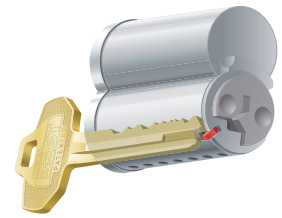

Maximize security with BEST's premier patented keying system.

BEST's leading high security keying system delivers a unique, multi-layered solution to protect your assets for years to come. CORMAX's long patent life ensures protection from unauthorized key duplication through 2027, but the system also leverages a ground-breaking key and pin design that prevents non-CORMAX keys from engaging the locks. Premium materials, unique features, and fully supported geographical exclusivity put CORMAX keying systems at the forefront of the industry.

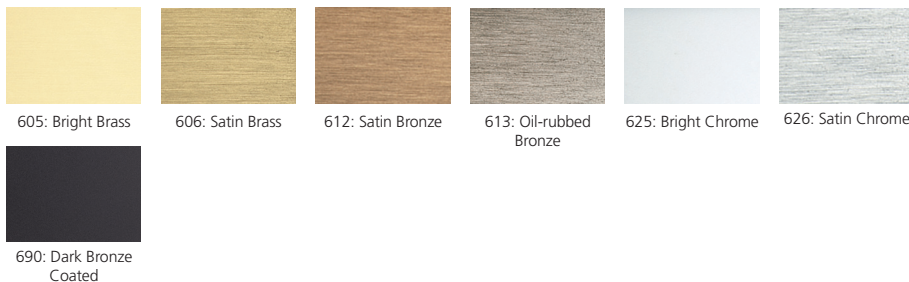

Create a flexible, scalable solution with CORMAX's layered security.

Geographical exclusivity, options for hybrid solutions, and masterkey support for the life of the system make a CORMAX solution flexible as well as secure. Precise engineering and tight tolerances ensure the highest mechanical security and lock integrity, while features like individually capped core pin chambers and compatibility with standard tools make installation and maintenance simple.

CORMAX Key System Specifications	
Certifications	ANSI/BHMA A156.5 Series—Grade 1 Utility patent: 2027 BAA & TAA compliant
Product Specifications	Core: Brass Key: Nickel silver SFIC Construction Core available
Keying	6- or 7-pin SFIC X Series featuring thicker keys with larger bows M Series backward compatible with J, K, L, and M keyways 32+ unique keyways 128 level options
All Finishes	605: Bright Brass 606: Satin Brass 611: Bright Bronze 612: Satin Bronze 613: Oil-rubbed Bronze 625: Bright Chrome 626: Satin Chrome 690: Dark Bronze Coated
Warranties	Three-year limited

Featured Finishes

Features

BEST CORMAX

- **Enhanced security.** CORMAX delivers the highest mechanical security and lock integrity with the tightest tolerances and a unique key and pin design that prevents any unauthorized key use.
- **Long patent life.** Our premium patented key system protects against unauthorized key duplication until 2027.
- **Layered exclusivity.** CORMAX offers four layers of geographical exclusivity—including nationwide—allowing us to meet customer specifications.
- **Lifetime support.** Dedicated key system specialists are on hand to help design and service CORMAX systems, including masterkey support, for the life of the system.
- **Ideal retrofit solution.** The CORMAX M Series provides an ideal hybrid solution for larger facilities or retrofit applications. The M Series integrates CORMAX and BEST Standard Cores in J, K, L, and M keyways, allowing CORMAX security for perimeter and high security openings while maintaining an existing key system on other doors.
- **Simple maintenance.** Individually capped core pin chambers reduce repinning labor, and compatibility with standard key cutting and combining equipment simplifies service. CORMAX makes rekeying easy with seamless interchangeability with any SFIC.
- **Greater durability.** Nickel silver keys, thicker key blanks, and larger key bows ensure extra strength, easier handling, and longer product life.
- **More scalability.** CORMAX offers more scalability with four keyways and two multi-milled key levels per key family, making masterkey system design easier even for multi-building facilities.

CORMAX delivers high security, fully supported, multi-layered patented keying systems you can rely on for years to come.
